Hello, I'm going to show you how to register an account in Express Me. When you start the app, you'll see this screen. Here you can choose between the different languages we support and then use the app in that language. I've selected Dutch, and now I'll go to register a new account. Then you'll need to fill in some details.

For example, the email address. Then I'll enter a password, and then I can accept the terms and conditions and privacy statements. And then I can click on register new account. What you'll see then is that we send a verification code to your email to make sure it's correct. This is a six-digit code. There it is already. And then you'll see here that I can copy the code. I'll go back to the app and enter it, and then I'll click on confirm new account. The code is verified and your account is created.

A free 90-day trial period is started right away. You can choose which language you want to see the content in first, and then all the content is prepared for you.

After that, you can basically use the app. Let's wait a few seconds while the tiles load. And indeed, here you can see the basic content that the app starts with. That's how you start a successful registration.
