

Communication portal guides

Find browser-based communication portal instructions here as they become available.

The communication portal is used in a web browser. This section is the home for instructions that specifically apply to that browser-based environment.

There are no step-by-step portal guides in this section yet. New portal instructions will be collected here so that they remain separate from instructions for the Express Me app.

Are you working in the Express Me app?

Choose the [App guides](#) instead. Those guides cover account setup, everyday use, tiles, and settings in the app.

Continue with the app guides

All app guides

Browse every available guide for the Express Me app.

Register an account

Follow the steps for creating a new Express Me account.

Build a sentence

Learn how to use tiles to build a sentence in the app.

Add a word tile

Adapt the communication board by adding a word tile.

Return to this section when you need instructions for the communication portal in your browser.
